About us

Vinci Play is a company bringing happiness to children all around the world.

We design, manufacture and install fully safe, aesthetically pleasing and extremely attractive playgrounds. We root for beautiful and imaginative design that stimulates the child's unbridled curiosity while encouraging kids to have fun together. Nearly as many as 100 million girls and boys play joyfully on the Vinci Play devices in over 60 countries around the globe. Such a vast number of parents have placed their trust in us because every day we strive to give children what they need so much – some carefree fun in a safe and friendly environment, while our customers can enjoy extremely durable, top-quality equipment covered by an unrivalled 30-year warranty. Our professional attitude makes us a reliable business partner for those companies and institutions that are looking for a competent playground manufacturer.

Our two factories equipped with the most modern equipment, including welding robots, 3D and 2D lasers and many other devices are enabling efficient and effective completion of orders. We employ over 250 people from all over the world, and we all have one goal: witness children's joy in safe, inspiring and fabulously colourful environment.

**100+ mln of
happy kids**

**ISO and TÜV
certificates**

What makes us unique

Advanced production processes

From the design, through production, all the way to shipping, the highest quality and safety of the playground are our priorities at every step of the way. In the production process, we implement only certified materials, and the multi-stage quality control system ensures that all equipment components that leave our production line meet stringent safety norms. We employ top specialists in their field who ensure a high standard of our products, reliable customer service and professional maintenance service of the equipment. Our modern machine park and advanced production organisation facilitate 4-week order processing. We also offer products with a 7 and 14-days production time and goods that are available directly from the warehouse.

We are proud to offer children, their parents and guardians the guarantee of carefree fun and relaxation on the playground, thanks to the strict safety procedures and quality standards implemented within our company.

Customer service

Our Customer Service department operates guided by the highest standards of cooperation, confirmed by the ISO 9001: 2015 certificate. The employees of this department endeavour to respond to inquiries addressed to the company within the shortest time possible while meeting the expectations of even the most demanding buyers. We guarantee cooperation based on the understanding of the customer's needs and offer full support at every stage of the contract execution, during the warranty period and afterwards.

Care for the environment

Care for the natural environment constitutes a vital aspect of our business activities. FSC® certificate number RINA-COC-000904: (licence number FSC® C163573) confirms the use of materials from properly managed FSC certified forests and other controlled sources. We follow the principles of sustainable development in all our undertakings, including the selection of contractors and suppliers. We hold the ISO 14001: 2015 certificate, which confirms the implementation of an environmental-management system.

Standards and safety

Children's safety is of the utmost importance to us, which is why all Vinci Play equipment complies with the EN 1176 European standard. The products also hold the TÜV Rheinland or TÜV SÜD certificate, which confirms their safety and high quality. Our high-end specialists support the Customer during the playground planning process to guarantee the compliance of the project with the applicable EU safety standards.

Quality control

All the elements that make up the final Vinci Play equipment undergo a multi-phase and precise quality control to ensure that they comply with the EN 1176 standard. Our quality specialists use modern laboratory, as well as devices and measuring equipment to evaluate the quality of materials at every stage of production - from the acceptance of goods or components, through all manufacturing steps, all the way to packaging and preparation for shipment. Owing to regular controls and audits of our suppliers and contractors, we make sure that we cooperate only with verified companies.

Design your playground!

Design a functional and safe playground with the 3D Planner application. Thanks to this user-friendly app you will be able to create several versions of the playground and choose the one you like the best in just 5 minutes. Upload a photo of the space you have at your disposal and fill it up with Vinci Play equipment. See what your new playground will look like in the morning, in the evening and during different seasons of the year. You will be able to export the created visualizations to .jpg/.png or .pdf files. Our 3D application will calculate the area needed for the installation of the Vinci Play equipment based on their safety zones, so that your modern playground can meet all the requirements of the EN 1176 standard.

Take care of the planet with Vinci Play

At Vinci Play, we want the free fun and joyful laughter of children to resonate in a clean, green environment, both now and in the next several dozen years. That is why we use what is best for the youngest and the natural environment - innovative post-consumer recycled materials. By using recycled materials, we help to reduce the incineration and storage of plastic waste, and we also support the development of new technologies for their processing.

Recycled plastic

We have replaced ordinary plastic with raw material made from used ropes and fishing nets. By using "green plastic", we reduce the amount of plastic waste on land and in the oceans.

Textile waste

Our durable construction poles are made of used textiles and foil. Recycling clothes and bags is key to reducing carbon dioxide emissions and reducing waste in landfills.

Wood

Our wood comes from controlled farms that care for biodiversity and ecological balance. Sustainable forest management prevents unfavorable climate changes.

Choose wisely

Now we can make sure together that the present and future generations grow up in safe for health environment. By choosing Recycled devices, you will build an ecological playground consisting of structural elements made of post-consumer waste.

Our “green” playgrounds are made of used textiles, foil and ocean nets. In this way, from waste that previously polluted the soil and air, we now create cheerful eco-places for creative play. Recycled devices are not only climate neutral, but also very durable and safe to use.

Playgrounds complying with the principles of the circular economy are our goal, which we persistently pursue. That is why we choose raw material suppliers who recover and process post-consumer waste, minimizing their negative impact on the environment. Ecological playgrounds are a choice for a healthy future for all of us.

We care for the good of the environment

For years, we have been producing construction elements for playgrounds based on modern technologies of plastic waste processing. Since 2014, the cores of all HDPE panels that we use in our production of play equipment are made of recycled materials. On the other hand, wooden structures of Vinci Play playgrounds are made of wood obtained in accordance with the principles of sustainable forest management. Consequently, we support the ecological balance of our planet. Recycled devices are a perfect fit for global efforts to keep lands and oceans clean, lower the emission of carbon dioxide and to protect the earth's precious resources. Separation of plastic waste and its processing into eco-raw materials are an important element on the way to the "green" future of our children and future generations. Meet the eco-methods of Vinci Play:

Roofs, side panels and manual elements are made of HDPE panels, which are made of recycled ocean nets and ropes.

The construction poles of the climbing devices are made of highly durable raw material, which is made of recycled textiles and foil.

Using raw Robinia acacia wood, without any chemicals in the form of impregnations and paints, we contribute to the reduction of CO₂ emissions.

Wooden elements of playgrounds are made of wood from certified suppliers managing forests in accordance with the principles of sustainable forest management.

Get to know our ecological solutions

Recycled products

For years, we have been striving to ensure that each element of Vinci Play playgrounds is safe for children and the natural environment. Our construction poles are made of eco-raw material, which is made on the basis of an innovative technology of processing used clothing and foil. This highly durable, eco-friendly material successfully replaces plastics in towers and ladder structures. Thanks to this, we reduce the amount of textile and foil waste in landfills and incinerators, thus reducing the emission of carbon dioxide to the atmosphere.

Sustainable raw materials

100% ecological playground?
With us, it is possible. Not only construction poles, but also “green” HDPE panels, which we use to build roofs, side panels and other structural and manual elements of Recycled devices, are made of recycled material. As a result, fishing ropes and nets no longer litter the oceans and land, but constitute a solid building material for our eco HDPE panels. This way, we become part of circular solutions for a clean natural environment and the future of all of us.

Wood from sustainable forest management

Pleasant to the touch, good-quality wood is the basis of a playground that is friendly to children and adults. When building with wood, we do not want to harm nature, which is why our wood comes from certified farms based on the principles of sustainable forest management. We choose suppliers who source wood in such a way as not to reduce forest resources and preserve their biodiversity.

Recycled, a better way!

Caring for the future of children and future generations, the idea was born to replace our classic elements of play equipment construction with post-consumer recycled materials. As a result, we have created a group of Recycled products based in 100% on recyclable materials that lower carbon emission.

Towers, slides, ladders, sandboxes, educational panels, spring rockers, swings and complementary elements, such as benches and litter bins - all produced with the use of recyclable materials.

What our ecological playgrounds consist of?

Composite posts

The posts are made of 100% recycled consumer waste, mainly clothing.

HDPE panels

Green HDPE panels made of 100% recycled ocean waste such as fishing nets and lines.

Plywood platforms

Anti-slip, waterproof plywood, coated with a hot-pressed phenolic film with a honeycomb surface imprint. It is PFEC-certified.

HPL panels

HPL sheets are resistant to chemical and biological factors, UV rays and fluctuating weather conditions. It is PFEC-certified.

Wooden posts

The wood is harvested from forests managed in accordance with the principles of sustainable development

Robinia wood

Acacia Robinia wood contains natural oils that protect the wood, so we use them in their natural form.

Quality & guarantee

The highest quality of our products is ensured by experienced specialists and high quality materials. That is why we can offer our customers a long-term guarantee of fault-free and fully safe use of our devices. We also provide post-warranty services. Orders for most spare parts are completed within 48 hours.

Recycled posts created from composite - an innovative material made of used clothes and foil. Roofs, side panels and manual elements are cut from HDPE plates, which are manufactured from ocean waste - fishing ropes and nets. Both construction poles and elements made of HDPE eco-panels are characterized by high resistance to changing weather conditions, thanks to which they are very durable and safe to use. Recycled series are TÜV certified.

Selected warranty periods:

30 year guarantee

Structural strength of steel and stainless steel components.

10 year guarantee

Structural failure of high density polyethylene and high pressure laminate components.

15 year guarantee

Structural failure of steel and stainless steel, for dynamic equipment; structural elements made of Robinia wood.

5 year guarantee

Corrosion of stainless steel and hot-dip galvanized and powder coated components; against bark beetles and rot in case of wooden structural elements.

*More information on other warranty periods for selected parameters - available on request in the Guarantee Card.

wooden recycled

Wooden now in Recycled option!

The WOODEN series now available in a new material version. Instead of painted wood construction, products are available in the Recycled option.

Various educational and sensory panels combined with moving elements will bring children a lot of joy and arouse great interest.

The environmentally friendly Recycled series devices stimulate the child's comprehensive physical development and also allow a large group of children to play together. Thanks to this, the child learns to establish relationships with peers and cooperate in a group.

solo • recycled

Fun for the youngest!

The SOLO series is a paradise for preschoolers, ruled by sand, water, sound and movement.

Free fun develops natural creativity, encourages experimentation and unleashes imagination and the desire to cooperate with other children.

Numerous manual and sound elements and educational panels stimulate the senses in a comprehensive way, stimulating the child's intellectual development.

climboo recycled

Climb, crawl and pull-up

The CLIMBOO series develops the skills and coordination of older children, increasing their self-confidence.

Various ladders and climbing walls of varying degrees of difficulty strengthen muscles and teach the child to concentrate and maintain balance.

This series is an ideal place to organize games with elements of competition, where exciting physical challenges are accompanied by maximum safety.

spring recycled

Rocking and swaying

The SPRING series is pure energy on springs. It satisfies a child's natural need for free and carefree swinging.

Various vehicles and cheerful animals on springs encourage toddlers to energetically jump and swing in rhythm with body movements.

Spring riders and rockers, loved by children, allow for joyful play, which also brings huge benefits for their psychomotor development.

hoop recycled

Spin, spin!

The HOOP series consists of carousels and spinners that power the world of laughing children.

Spinning is an important activity in a child's development - it helps the nervous system mature, stimulates the sense of balance, strengthens the muscles and skeletal system.

swing recycled

Swinging in a full swing!

The SWING series includes classic equipment loved by both younger and older children.

Colourful single swings, multi-person swings like the bird's nest, swing sets or see-saw swings provide children with a pleasant thrill and encourage them to play with friends.

park-recycled

Small park architecture

The PARK series is an essential addition to a child-friendly playground.

Comfortable benches and tables, waste bins, information boards and fences provide comfortable rest for children and their parents and guardians.

The modern and aesthetic design of small architecture harmoniously matches the playground equipment.

LEGEND

Platforms and climbing walls made from anti-slip and waterproof plywood or HPL HEXA panels – effective protection against environmental factors and wear-resistant

Steel construction and/or elements made of hot-dip galvanised and powder coated steel

HPL - the highest quality, water and UV resistant high pressure laminated panels

Connectors, screws, washers and nuts made of stainless steel and/or galvanised steel protected with plastic caps

Polypropylene (PP) or Nylon combination ropes with steel core

Rubber / PP protective tops

HDPE - high density polyethylene panels

Stainless steel or PE tube slides

Attested stainless steel chains

Carousel platforms made of HPL

Polycarbonate (PC) panels

Stainless steel (AISI 304 or 316)
- stainless steel structure
- stainless handrails and rods

Construction made of impregnated laminated wood, post dimensions: 90 x 90 mm

Steel spring 20 mm, sand-blasted, iron phosphated and double powder coated

Stainless steel or fiberglass slides with side panels made of HDPE or HPL

Tunnels made of durable, vandal-proof, double-layered material

Composite posts

Composite panels

Facilitated access for children with disabilities

Spinning elements

100% recycled HDPE
